Agaricus Extract: The Kidney Powerhouse

Over 5,000 years of Chinese medical science has proven that the main strength of the body lies in the kidneys (energetically speaking). When the kidneys weaken, your health is sure to fail and chronic health concerns can painfully linger. The first step back to good health is to strengthen the kidneys. The outcome of any disease ultimately depends on the power of the kidneys. A special, patented mushroom extract made from *Agaricus bisporus* can dramatically boost the body's kidney function. We call agaricus extract the Kidney Powerhouse.

Many factors weaken and damage the kidneys, especially the long term stress of chronic illness. Other common kidney-depleting factors are physical and emotional stress, taking certain medical drugs on a regular basis (especially antibiotics, pain killers and high blood pressure medication), using street drugs such as marijuana, and eating a poor diet including too much red meat, coffee, fried foods, chips, white sugar, hydrogenated oils, soft drinks, foods with aspartame and other toxic food additives. This mighty little mushroom, agaricus, can help to turn back all this damage by strengthening the kidneys.

Stinky Toxins In Your Bowels

More than 100 trillion bacteria exist in the intestines. Certain bacteria, such as *E. coli*, decompose protein and fat from your diet, releasing foul-smelling breakdown products in your intestines. These putrid chemicals, such as ammonia, indoles, skatoles, triptamine, mercaptan, hydrogen sulfide, and amines, can be absorbed through the bowel lining into your blood. Once in the blood, these harmful chemicals can go all over the body and cause

distress. They can travel to your brain and create depression, foggy thinking, anxiety or poor memory. They can create chronic fatigue, kidney stress, aching joints, saggy skin, liver stagnation, rapid aging and much more.

Agaricus can dramatically purify the blood. Research shows that it can radically reduce or completely eliminate putrid chemicals in the blood.

Cordyceps: Superior Kidney and Lung Tonic

Gaining The Athletic Edge

This amazing mushroom extract has made international sports news. After regular consumption of cordyceps, a team of Chinese women runners shattered 9 world records, breaking the record for the 10,000 meter run by an unprecedented 42 seconds (Chinese National Games, 1993). In another example, a Boston marathon runner who had been taking cordyceps, cut an unbelievable 25 minutes off his time and placed in the top ten winners.

Premier Kidney and Lung Tonic

The use of cordyceps dates back to ancient China as a famous kidney and lung tonic. It was used to help boost the body after long term health concerns. Excellent clinical results in recent times have been reported for those with stressed kidney functions.

Research has shown it can increase 17-hydroxy-corticosteroid and 17-ketosteroid levels.

Building Super Blood And Brain Relief

Cordyceps is also a premier blood builder. Cordyceps also has an excellent potential to fight mood swings and brain fog since it naturally inhibits monoamine oxidase in the brain without side effects.
